Things that must be provided in the architectural project when it is successful

- **The shape** ➡ the shape likes to be beautiful and modern in order to attract the love and interest of buyers.
- **The price** ➡ should be the right price with different facilities.
- **Artificial Intelligence** ➡ the introduction of artificial intelligence and technology inside buildings leads to providing more comfort and giving a future shape to the project, which leads to attracting more customers.
- **Services** ➡ availability of services that the client provides inside and outside the buildings so that he does not find difficulties in anything.
- **Location** ➡ the project site should be in a vital and distinctive place in order to be close to all services and make access to any place faster and easier.
